- Tan Xiao Tian 0334852
- Yap Pui Mun 0334965
- Low Zheng Yan 0334960
- Ng Jian Yu 0335019
- Beh Ee Peen 0335484

TEAM FLAG

Team philosophy/manifesto

The name of our group for this assignment is "Greenworks" and I know it may strike up a question or two in your head.

"Why Greenworks?"

"What does Greenworks even mean?"

We were inspired by the famously renowned DreamWorks Animation. According to its website on www.dreamworksanimation.com,

Film

DreamWorks Animation believes that great stories inspire great possibilities. Striving for the best storytelling imaginable, DreamWorks rewrites the rules of what's been done by encouraging its team and fans alike to imagine something different.

"imagine something different"

This struck a chord in our members as we got to thinking.

What if we imagined something different?

✧ *Imagine a world different* ✧

A world where dolphins and seals aren't hunted for the use of mankind.

Not just as an exotic delicacy, but also for *entertainment* purposes.

When we think of places like SeaWorld and aquariums like Aquaria KLCC, they're pictured as a fun indoor "aquarium" where anyone can go to have fun with aquatic creatures and take pictures and touch and study them. Everyone is always excited to take pictures with smiling dolphins and watch seals perform quirky acts.

however,

N O O N E ever thinks about "Where do these animals come from?"

"How were they brought here?"

GREENWORKS

We hope that **Greenworks** can help out in spreading awareness about what takes place behind these industries.

Opting for cruelty-free options is not that difficult of a choice to make.

For example, we can always choose to watch circuses that don't exploit animals. A famous example is [Cirque du Soleil](#).

We can always stay away from aquariums and seaworlds because there are books and museums and even TV programs like Discovery Channel that exhibit more details about these animals and wild creatures for the public to study and learn about. The only difference is that we are learning about them in their natural habitat instead of caging them in a limited space. The ocean is a vast place and animals that belong there should never have to call an indoor-aquarium their 'home'.

As millennials, we believe that it is also our responsibility to reduce and if possible, eliminate the use of plastic in our daily lives.

We should also skip products that contain microbeads that are often found in body scrubs and exfoliants. These tiny plastic particles have the ability to cause severe digestive problems to marine animals in the long run.

COLLECTION OF VOTES.

We shared these factors with our fellow peers on campus. Our votes were collected on leaf-shaped notes in order to match our theme.

Our group members also shared our group photo, using the hashtag **#CTSMarch2018assgn1**
